Village of Pugwash
Waterfront Development Design
Community Feedback

The Municipality of Cumberland County intends to carry out various downtown and waterfront improvements in the Village of Pugwash over the next several years broadly in accordance with the Pugwash Waterfront Improvement Concept (BDA Landscape Architecture and Site Engineering, 2015).

Community residents and officials had come to realize that efforts to achieve individual project objectives could be more successful, and ultimately, the impact on community economic development in the area could be greatly increased, by integrating many of the projects into one comprehensive plan. Through the development of the Pugwash Waterfront Improvement Concept, meeting and brainstorming sessions were held with a community-led project steering committee and community meetings and open houses took place.

With the vision and concept for the Waterfront established, the Municipality is now prepared to take design to the next level of development. The current phase of the project builds upon the previous concepts to further develop the design of various project components and allow for cost estimates. As part of this current phase, the Municipality feels it is important to further engage stakeholders and the community.

The following are the types of questions the consultants will be addressing in the study. Please feel free to provide your perspective on these questions and provide any other input, questions or concerns that you feel may be of value to the study. Please send your comments via e-mail to **mbyers@cumberlandcounty.ns.ca**, no later than **May 15th, 2017**. Thank you.

If you have any questions about the study, please contact Michelle Byers, Community Economic Development Coordinator, Municipality of Cumberland County at (902) 297-2765 during regular business hours.

FACILITY USE & NEEDS

1. Please describe if and how you currently uses the Pugwash Waterfront and the amenity spaces.

2. Do you feel the current spaces adequate, why or why not?
